high death rates and low birth rates D. a flood 3. hurricanes E. North America B. FALSE Abbott - Chapter 01 #29 17. South America C. FALSE Abbott - Chapter 01 #49 50. In the last 50 years of the 20th century, world population grew from _____ billion to over 6 billion. it has a high population density, most of the world's earthquakes and volcanic eruptions occur here, and precipitation rates are very high in this region, producing frequent, large, and sudden floods are correct 2. The growth of human population worldwide over the past 1000 years has been _____. At present, the world population is growing at about 1.2 percent per year for a doubling time of 58 years. 4 C. 2 | P a g e 4. TRUE Abbott - Chapter 01 #43 44. high death rates and high birth rates 20. Asia Abbott - Chapter 01 #3 11. Which of the following is not one of Public Safety Canada's four pillars of emergency management? Europe D. 0.12 C. meteor impacts D. 3 | P a g e 9. 3.5 D. In the last 50 years of the 20th century, the world population of humans grew from 2.5 billion to over 6 billion. 70 years E. If 6 billion people stood shoulder-to-shoulder with each person having his or her own 1-metre by 30-cm space, the entire world population would fit inside a square fence about 42 kilometres on a side. True False 44. it takes for emotional recovery of victims D. 2 litres per person per day C. 0.02 B. a flood Abbott - Chapter 01 #8 9. a flood 8. True False 42. None of these are correct. it has a high population density, most of the world's earthquakes and volcanic eruptions occur here, and precipitation rates are very high in this region, producing frequent, large, and sudden floods are correct Abbott - Chapter 01 #1 2. TRUE Abbott - Chapter 01 #40 41. TRUE Abbott - Chapter 01 #47 20. 5 | P a g e 19. True False 50. Which of the following disasters has the highest probability of causing a "10-fatality event" each year? FALSE Abbott - Chapter 01 #35 18. 8 | P a g e 40. low death rates and high birth rates C. 6 | P a g e 20. In the 1998 St. Lawrence River Valley ice storm, 45 people died from _____. fire E. between events of the same type, regardless of size Abbott - Chapter 01 #6 7. one trillion Abbott - Chapter 01 #11 13. 280 years Abbott - Chapter 01 #14 15. hypothermia B. 7 | P a g e 32. before survivors return to their homes B. FALSE Abbott - Chapter 01 #28 29. 8 D. all of these 23. TRUE Abbott - Chapter 01 #34 35. Most of the 40 deadliest disasters between 1970 and 2005 occurred in a belt running from China and Bangladesh through India and Iran to Turkey. FALSE Abbott - Chapter 01 #45 46. True False 10. 14 years C. True False 36. The locations of the worst dollar-loss disasters for the insurance industry present a very different picture than the list of worst locations for fatalities in the last three decades of the twentieth century. low death rates and low birth rates C. The growth rate of the world population equals _____. TRUE Abbott - Chapter 01 #38 39. TRUE Abbott - Chapter 01 #37 38. all of these Abbott - Chapter 01 #21 22. Mexico B. on a straight linear increase with time E. The rate of world population growth has increased from 1.8 percent in 1990 to 4.4 percent in 2000. birth rates have skyrocketed, while death rates have plunged 11. The amount of water recommended for a home emergency kit is _____. exponential, with a constant growth rate C. TRUE Abbott - Chapter 01 #44 45. the birth rate minus the death rate C. The majority of Canadian disasters from 1900 to 2005 are not due to natural causes. fires Abbott - Chapter 01 #5 6. 280 years 15. True False 49. 140 years D. a tornado E. Tibet E. mitigation D. response B. an earthquake B. TRUE Abbott - Chapter 01 #30 31. True False 31. The rapid increase in human population during the past several centuries is an example of _____ growth. 3 | P a g e 8. TRUE Abbott - Chapter 01 #39 40. TRUE Abbott - Chapter 01 #31 32. low death rates and low birth rates B. earthquakes B. True False 43. 8 litres per person per day 25. The difference between a world population in the year 2150 of 3.6 billion or 27 billion rests on a difference of only 1 child per woman. If a 1.2 percent annual rate of human population increase were to continue without change into the future, the volume of human flesh would about equal the volume of the Earth in less than 2,000 years from now. algebraic C. If a particular disaster has a high frequency of occurrence, then it also has a large return period (recurrence interval). True False 8. 6 | P a g e 24. TRUE Abbott - Chapter 01 #50 21. In the last two or three centuries _____. 80 hours D. all of these Abbott - Chapter 01 #22 23. A. 10 | P a g e 42. 1 | P a g e c1 Key 1. weather-related disasters C. True False 30. True False 45. In the 1998 St. Lawrence River Valley ice storm, freezing rain fell for _____ over 5 days. most of the world's earthquakes and volcanic eruptions occur here C. floods C. 4 | P a g e 12. 4 litres per person per day D. Today, the less-developed countries have _____. 800 Abbott - Chapter 01 #15 14. Africa E. a volcanic eruption C. 100 hours Abbott - Chapter 01 #20 21. 9 | P a g e 48. between events of the same type, regardless of size 7. At present, the world population of humans is growing at a rate of _____% per year. 3 E. In the period between 1970 and 2005, 26 of the 40 worst disasters occurred in a belt running from Bangladesh through India and Iran to Turkey. In general, the larger and more energetic the disaster event, the shorter the return period between such events. 8 litres per person per day Abbott - Chapter 01 #24 25. parabolic D. True False 34. The age distribution of a population (relative proportions of people of different ages) is not important when considering the growth rate of that population. all of these 22. TRUE Abbott - Chapter 01 #26 27. The likelihood over 20 years of a hurricane that kills 1000 people is greater than that of an earthquake that kills 1000 people. a hurricane D. 24 hours B. 1.2 D. 8 | P a g e 30. By the year 2000 B.C.E., the world's total population was over 6 billion. World population growth presently varies greatly from one region to another. True False 7. The return period of a disaster is the average number of years _____. carbon monoxide poisoning D. tornadoes 3. TRUE Abbott - Chapter 01 #48 49. When carrying capacity decreases, populations collapse in mass die-offs. 800 16. The annual likelihood of a tornado that kills 10 people is less than that of an earthquake killing the same number of people. preparedness Abbott - Chapter 01 #23 16. In general, there is an inverse correlation between the frequency and the magnitude of a disaster process. 13. True False 29. The greatest insurance dollar losses as a result of natural disasters in the last three decades of the 20th century occurred in _____. Abbott - Chapter 01 #12 13. it has a high population density and precipitation rates are very high in this region, producing frequent, large, and sudden floods are correct E. exponential 10. At present, after subtracting deaths from births, world population increases 1.3 percent per year for a doubling time of _____. FALSE Abbott - Chapter 01 #42 43. 12 E. 22 Abbott - Chapter 01 #13 14. 1 | P a g e c1 Summary Category # of Questions Abbott - Chapter 01 50 Natural Disasters Canadian 1st Edition Abbott Test Bank Full Download: This sample only, Download all chapters at: alibabadownload.com exponential, with a generally increasing growth rate D. unaffected by technology Abbott - Chapter 01 #16 17. 11 | P a g e 48. 58 years B. True False 37. exponential Abbott - Chapter 01 #9 10. Beginning in the eighteenth century, discoveries in science, medicine, and public health caused death rates to drop dramatically. 1. 5 | P a g e 16. high death rates and high birth rates 5. The present human population of the world is a little more than _____. 2.5 Abbott - Chapter 01 #17 18. geologic disasters B. essentially zero B. A very slow exponential growth rate of population can continue indefinitely on an Earth of finite size and resources. 22 4. birth rates have changed little, while death rates have plunged B. TRUE Abbott - Chapter 01 #41 19. Today, the world growth rate for human population is rapidly declining. TRUE Abbott - Chapter 01 #32 33. storms D. FALSE Abbott - Chapter 01 #27 28. recovery C. 0.08 B. During the last half of the 20th century, earthquakes, tsunami, and _____ account for the majority of deaths from natural disasters. China C. volcanic eruptions C. Asia dominates the list of the 40 worst killing disasters of the last three decades of the 20th century, with almost 86 percent of the fatalities occurring in these regions. both birth rates and death rates have skyrocketed D. both birth rates and death rates have plunged C. fires 6. landslides E. The list of most costly Canadian disasters is dominated by earthquakes, volcanoes, and tsunami. 2.5 18. At present, the world population of humans grows by over _____ million per year. 100 billion E. high death rates and high birth rates Abbott - Chapter 01 #19 15. Based on insurance industry records of economic loss from natural disasters, 32 of the 40 most expensive disasters between 1970 and 2005 were _____ and floods. the birth rate plus the death rate B. precipitation rates are very high in this region, producing frequent, large, and sudden floods D. preparedness 6. FALSE Abbott - Chapter 01 #36 37. This area was particularly vulnerable because _____. India Abbott - Chapter 01 #4 5. The fact that Canada has not experienced a great geological disaster is in part due to the relatively short history of the country. the United States D. 7 | P a g e 24. TRUE Abbott - Chapter 01 #33 34. 4 | P a g e 14. FALSE Abbott - Chapter 01 #46 47. one trillion 12. 48 hours C. the death rate minus the birth rate D. 500 million B. India 5. volcanic eruptions B. TRUE Abbott - Chapter 01 #25 26. Disasters occur where the Earth unleashes its concentrated energy. 80 E. linear B. True False 46. True False 26. 1 litre per person per day B. tornadoes Abbott - Chapter 01 #2 3. 100 hours 21. 6 billion C. Based on data for the period from 1947 to 1980, the continent of _____ experienced the greatest loss of life from natural disasters. 1 | P a g e Chapter 1: A Global and Canadian Outlook on Natural Disasters Student: _____ 1. a flood Abbott - Chapter 01 #7 12. 5 B. it has a high population density B. True False 39. True False 38. Of the 40 worst disasters between 1970 and 2005, the most frequent mega-killers were earthquakes. The overall increase in Canadian natural disasters from 1900 to 2005 is due mainly to _____. birth rates have skyrocketed, while death rates have plunged Abbott - Chapter 01 #10 11. integrated E. True False 28. low death rates and high birth rates B. unaffected by technology 17. 9 | P a g e 36. True False 41. True False 33. 0.8 C. landslides D. ice falls C. Most of the more-developed countries have _____. True False 9. between same-sized events E. 60 billion D. before the economy returns to pre-disaster levels C. True False 27. high death rates and high birth rates Abbott - Chapter 01 #18 19. evacuation E. True False 35. Asia Natural Disasters Canadian 1st Edition Abbott Test Bank Full Download: This sample only, Download all chapters at: alibabadownload.com 2. Which of the following disasters has the highest probability of causing a "1,000-fatality event" each year? True False 47.
